## ORDER FORM

If you would like to receive the Dangerous Decibels DVD and/or Teacher Resource Guide please complete the following and send a check or credit card information to the address listed below.

DVD = a multilayered introduction to how we hear (simple or more complex versions), what are decibels, types of hearing loss, how to protect ears, tinnitus (short or fuller version with testimonial), and more, includes demonstrations of classroom activities that can be done. Fun and appropriate for children in a classroom. Comes with a fold-out poster (7"x24") that shows decibels levels and exposure time limits for everyday sounds, and how to prevent noise-induced hearing loss.

Guide = Illustrated, spiral paperback (8.5 x 11 and 105 pages) K-8 classroom supplement with hands-on activities, background information, and experiments. Activities cover the anatomy and physiology of hearing, how to prevent noise-induced hearing loss, and the physics of sound. This can also be downloaded free from our website.
